	1008	Cool-X Cold-Hot Cream	150 ml	tube
	1299	Cool-X Cold-Hot Cream	100 ml	tube
	coming	Cool-X Cold-Hot Cream	75 m	Roll-On bottle
Intended Use	Intended to be used topically on skin for treatment of muscle and joint pain, swelling, muscle tension			
Definition	Cool-X Cold-Hot is a dual action cream for relieving muscle and joint pain. The effect begins with cooling, changing to warming. Menthol cools, relieves pain, reduces swelling and triggers muscle tension. Capsicum extract warms the area to be treated, stimulates blood circulation and metabolism.			
Instructions for use	Apply onto the treated area 2-4 times a day. Start with a small amount, add as needed. Wash hands thoroughly after use. <a href="#">Exercise, sauna and warm shower will enhance the warming effect.</a> Avoid contact with irritated or broken skin, eyes and mucous membranes. Keep the cream at room temperature out of the reach of children. Contact your doctor if the symptoms persist for a long time. For external use only.			
Designed User	The target group for Cool-X Cold-Hot Cream is all people, regardless of age, gender or race.			
Indications	Muscle and joint pain, muscle tension.			
Description of warnings and precautions	Not for children under 6 years of age, pregnant or breast-feeding women, persons with sensitive skin, chili or salicylic allergy. Due to its effectiveness, the cream can cause redness or heat of the skin. Continuous use for max 3 weeks.			
Contraindications	Broken and sensitive skin, chili or salicylic allergy. Children under 6 years of age, pregnancy, breast-feeding.
